Dade, 1636.

A Prognostication,  
in which  
you may behold  
the state of this  
yeare of our  
Lord God.  
1636.

Being the *Leap-yeare*

Made and set forth by  
*W. Dade, Gent.*

LONDON,  
Printed for the company  
of Stationers.  
1636.

The beginning and ending of  
the Terme this present yeare  
1636. with their  
Returnes.

Hillary Terme, beginneth the 23. of January, and  
doth end on the 12. of February, & hath 4. Returnes.

1. Octabis. Hillarie } 3. Crast. Purifica.  
2. Quind. Hillarie. } 4. Octabis. Purifica.

Easter Terme, beginneth the 4. of May, & endeth  
the 30. of May, and hath 5. Returnes.

1. Quind. Pasch. } 3. Menie Pasch. } 4. Quinque Pasch.  
2. Tres Pasch } 5. Crast. Ascen.

Trinity Terme beginneth the 17. of June, & endeth  
the 6. of July, and hath 4. Returnes.

1. Craft. Iun. } 3. Quind. Trin.  
2. Octab. Trin. } 4. Tres Trin.

Michaels Terme beginneth the 10. of October, and  
endeth the 28. of November, and hath 8. Returnes.

1. Octabis Michael. } 5. Craft. Animarum.  
2. Quind. Michael. } 6. Craft. Martini.  
3. Tres Michael. } 7. Octabis Martini.  
4. Menie Michael. } 8. Quind. Martini.

Note also, that the Exchequer openeth eight  
dayes before any Terme begins, (except Trinity  
Terme) in which it openeth but fourt dayes be-  
foreg.

# A description of the four Quarters of the yea. r.

And first of Winter.

On ye. m. x.

The Winter Quarter (Astroonomicall) for this yea.  
r 1636. began the last passed yea.  
r 1635. vpon Saterday the 12 day of De-  
cember, when the Sunne did enter the first de-  
gree of *Capricorne*, and doth end this yea.  
r uppon Friday the 11. of March: for then the Sun  
entereth into *Aries*, making the first Equi-  
noctiall.

This Winter Quarter of his proper nature  
is cold and moyst, and of complexion Fleg-  
matick, good for whole and sound people but  
dangerous to those that are sick and diseased.  
In this Season the inward parts of every sensi-  
ble creature are very hot, and (being health-  
full) they may receive great plenty of food, be-  
cause natural heat is now comforted, for it is  
driven inwards, and there increaseth, and ma-  
ketth the digestion more strong.

The Sickneses whereto this Quarter is

## A Prognostication.

most inclined, are Rheumes, Goutes, Palsies, Pushes, sore Eyes, melancholy, Coughes, Catthars, Sciaticas, paine in the Breast & Lungs with divers Infirmities incident amongst women, &c.

---

### Of the second Quarter of the yeare cal- led the Spring.

¶ in V. 8. II.

**T**HE Spring time (being the second part of the Astronomicall yeare) taketh his beginning on Friday the 11. day of March; when the Sun entereth into the first degree of *Aries*, the Equinoctiall point, making the dayes and nights of equall length.

This Spring Quarter continueth untill Sunday being the 12 of Iune following, when the Sunne enters into the Signe *Cancer*.

This Season is naturally hot and moyst, and is of the *Sanguine* Complexion, being the most temperate and healthfull time of the yeare; yet bringeth it (or rather sheweth forth) many diseases, not engendering them by excesse, but discovering them which were inwardly bred by the destemperature of other times;

Dade. 1636.

times: yet it is the most fitting Season to expell diseases that have beene of any long continuance.

The Infirmitieſ of this Quarter are measles, ſmall poxes, Scabbes, Agues, Chollick, burning Feavers, and others proceeding of corrupt Blood.

---

Of the third part of the yeare called  
Summer.

On S. A. M.

**T**He Summer, (accounted the third part of the yeare Astronomicall) being naturally hot and dry, and of the Cholerick complexion, doth begin at the Sunnes entrance into the firſt degree of *Cancer*, which will be this yeare vpon Sunday the 12. day of June, where he maketh his Summer Solſtice, and hath his greatest declination to the north frō the Equinoctiall: Now are the dayes longest and the Nights ſhorterſt; and Summer doth continue untill Tewesday the 13. of September.

New cannot the ſtomack digest ſuch hard meates as it may in the winter ſeafon, for the

### A Prognostication.

naturall heate is now distributed unto the exterior parts, and man is not now so hot within as in winter.

The Sickenesses of this season generally are hott Feavers and burning Agues, Scabs, Pustules, Jaundies, vomits, sore mouth & throat, with paine in the Head and Backe.

---

### Of the fourth part of the yeare called Autumne or Harvest.

O. m. M. T.

**A**utumne or Harvest, being the fourth and last part or Quarter of the yeare (with the Astronomers) being naturally cold and dry, and of the melancholy Complexion, beginneth on Tewesday the 13. of September, when the Sunne forfaketh the last degree of *Virgo*, and then entereth into the first degree of *Libra*, where he then maketh the Equinoctiall hyemall, working the same effect that he did at his going into *Aries*, that is, making the dayes againe of an equall length to the nights, he rising at six in the morning, and setting at six at night; and this Quarter doth end on monday the 12 of December.

Of

*Date. 1636.*

Of all the other Quarters this is the most unwholesome, for it is more subject to sicknesses then any other, for the dregges of all diseases of the former part of the yeare will burst forth and shew it selfe.

The diseases of this Quarter are many and dangerous, as Blacke-jaudes, Faling-sicknes, dropsies, Consumptions, Megruins, Byles, Emrods, Spleene, Cramps, Tooth-ach, Coughes, Melancholy, &c.

doctors & apothecaries of the city of London  
are to be found in the following page

---

1636. 10

# A Prognostication
